

Drawing Feedback for HFS

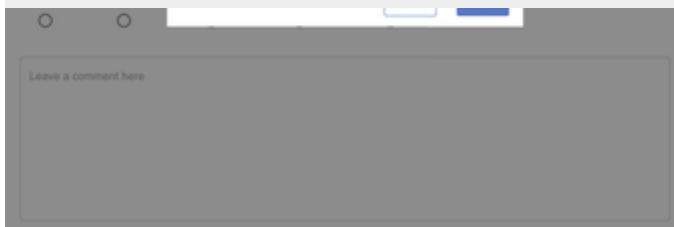

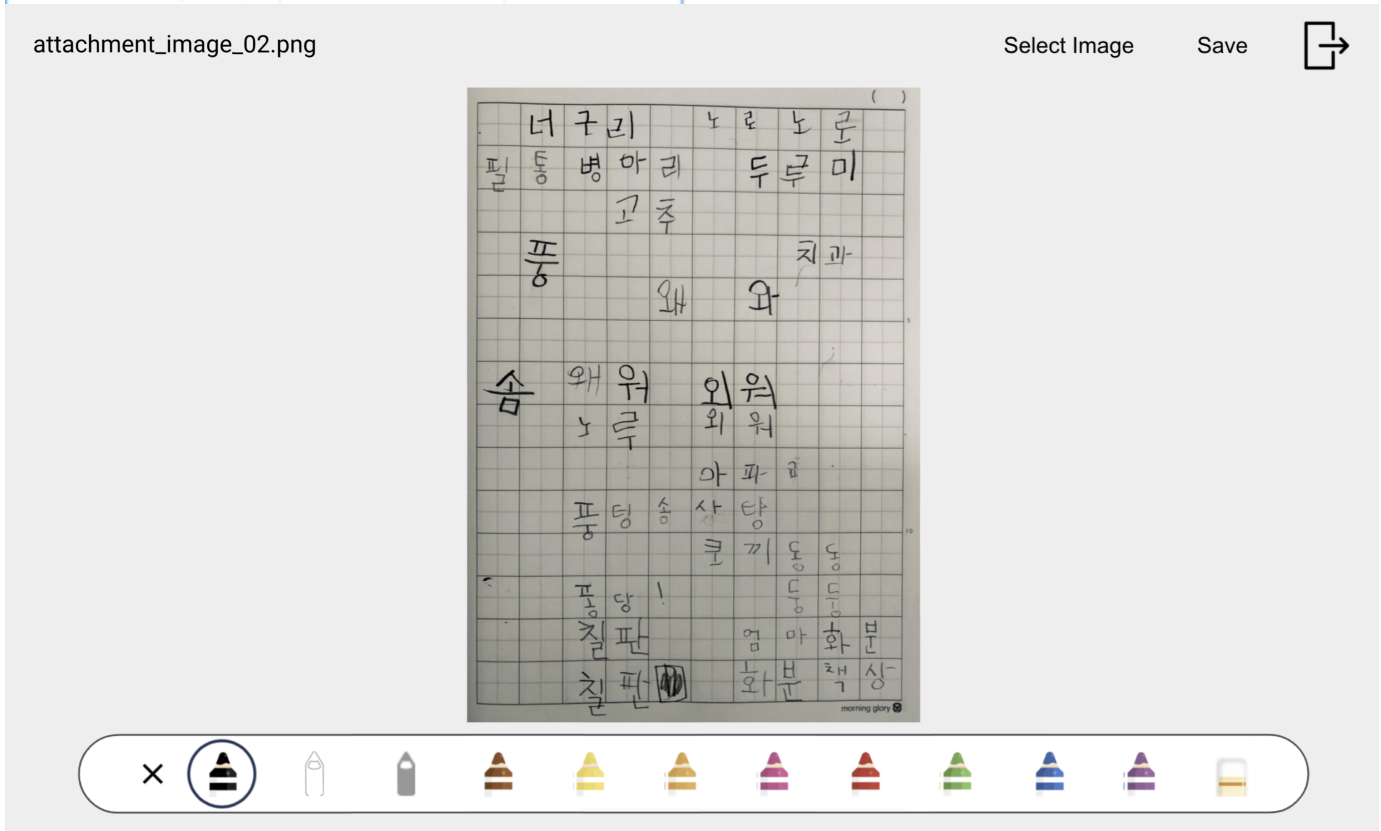

Objective

- Teachers need to be able to give feedback on top of the uploaded pictures from students for Home Fun Study.

Requirements

- Add a button to open the image selection popup
- By clicking the button, user can select a picture among submitted pictures
- Only image format files should be listed (jpg, png, gif)
- By clicking OK button from the selection popup, the user can open the editor

- Editor screen takes full screen
- The selected picture displayed in the center of the screen
- Selected file name displayed to know which file the teacher is working on
- 3 buttons added
- Select image: able to change the image selection
- Save: save the drawings drawn so far
- Exit: close this editor (Asking for if the user wants to discard the changes)

- Drawing tools
 - Color pencils
 - Eraser

Select File to Provide Feedback

☐ Feedback Provided attachment_image_01.jpg
 ☒ attachment_image_02.png
 ☐ Feedback Provided attachment_image_03.jpeg
 ☐ attachment_image_04.gif
 ☐ Feedback Provided attachment_image_05.bmp

- The teacher can provide feedback to the entire uploaded images.
 - By opening an image in the editor and saving it, a small tag appears on top of the file name says "Feedback Provided"
 - A teacher can easily check which files are not given the feedback by seeing the tag
- Even though the teacher provided drawing feedback once, she can open the file and edit it by selecting the image file from the file selection popup.
 - Files that already have saved drawing feedback will display the little tag
